Foreword

I take pleasure in presenting the 94th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1963.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

B.A., Q.C.,

Registrar General

SIR :

I have the honour to submit for your approval the Ninety-fourth Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1963.

I have the honour to be, Sir,

Your obedient servant,

R. B. Wallace

Deputy Registrar-General.

TO THE HON. JOHN YAREMKO, B.A., Q.C.
Registrar General of Ontario.

*As of January 1962, stillbirths of 20 weeks' gestation or more were registered.

Infant Mortality

Shown in Table I are the numbers of infant deaths by age at death over the ten-year period 1954 to 1963. The steadily decreasing neonatal and infant death rate and the stillbirth rate are shown in Chart 3.

General Mortality

The trend in general mortality over the period 1939 to 1963 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.

REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 95th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1964.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

B.A., Q.C.,

Registrar General.

SIR :

I have the honour to submit for your approval the Ninety-fifth Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1964.

I have the honour to be, Sir,

Your obedient servant,

R. B. Wallace

Deputy Registrar-General.

TO THE HON. JOHN YAREMKO, B.A., Q.C.
Registrar General of Ontario.

General Mortality

The trend in general mortality over the period 1940 to 1964 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.

(2) Rates per 100,000 population.

(3) The former method of coding tuberculosis deaths was amended effective January 1st, 1962, by the Dominion Bureau of Statistics in order to comply with the mortality classification under the International Classification of Diseases. This has resulted in a considerable increase in the number of deaths when compared with the method of coding deaths in previous years.

REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 96th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1965.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

B.A., Q.C.,

Registrar General

SIR :

I have the honour to submit for your approval the Ninety-sixth Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1965.

I have the honour to be, Sir,

Your obedient servant,

R. B. Wallace

Deputy Registrar-General.

TO THE HON. JOHN YAREMKO, B.A., Q.C.
Registrar General of Ontario.

General Mortality

The trend in general mortality over the period 1941 to 1965 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.

(1) Per cent of total deaths.

(2) Rates per 100,000 population.

(3) The former method of coding tuberculosis deaths was amended effective January 1st, 1962, by the Dominion Bureau of Statistics in order to comply with the mortality classification under the International Classification of Diseases. This has resulted in a considerable increase in the number of deaths when compared with the method of coding deaths in previous years.

REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 97th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1966.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

Robert Welch

Q.C.

Registrar General.

SIR :

I have the honour to submit for your approval the Ninety-seventh Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1966.

I have the honour to be, Sir,

Your obedient servant,

R. B. Wallace

Deputy Registrar-General.

†Rates not computed for less than 5 stillbirths.

*Previous to 1962 stillbirths of 28 weeks' gestation and over were registered. As of January 1962 stillbirths of 20 weeks and over were registered. For the years 1962-1965 figures for 28 weeks and over may be obtained from Table 22 in the reports for those years and for 1966 from Table 12.

Infant Mortality

Shown in Table I are the numbers of infant deaths by age at death over the ten-year period 1957 to 1966. The steadily decreasing neonatal and infant death rate and the stillbirth rate are shown in Chart 3.

General Mortality

The trend in general mortality over the period 1942 to 1966 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.

REGISTRAR GENERAL

Foreword

I take pleasure in presenting the 98th Vital Statistics Report compiled by the Office of the Registrar General. This report is prepared in two parts.

Part I indicates the trend over the past years in the general state of health of the people of Ontario. Such general trends emphasize certain specific problems in the field of public health such as infant and maternal mortality and deaths from such diseases as heart and cancer.

Part II comprises detailed tables covering the various aspects of vital statistics for the Province of Ontario in 1967.

In conclusion, may I state that, while this report is primarily of interest to certain professions and agencies, it will give other interested persons an insight into the vital statistics concerning births, marriages and deaths in the Province of Ontario.

Robert Welch

Q.C.

Registrar General.

Sir :

I have the honour to submit for your approval the Ninety-eighth Vital Statistics Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1967.

I have the honour to be, Sir,

Your obedient servant,

H. J. Humphries

Deputy Registrar-General.

To The Honourable Robert Welch, Q.C.
Registrar General of Ontario.

†Rates not computed for less than 5 stillbirths.

*Previous to 1962 stillbirths of 28 weeks' gestation and over were registered. As of January 1962 stillbirths of 20 weeks and over were registered. For the years 1962-1965 figures for 28 weeks and over may be obtained from Table 22 in the reports for those years and for 1966 and 1967 from Table 12.

Infant Mortality

Shown in Table I are the numbers of infant deaths by age at death over the ten-year period 1958 to 1967. The steadily decreasing neonatal and infant death rate and the stillbirth rate are shown in Chart 3.

General Mortality

The trend in general mortality over the period 1943 to 1967 is shown in Table M. Tables N to P illustrate the general mortality by age and/or cause. Special detailed tables for specific causes are shown in Tables Q to T. Special cross classification of accidental and violent deaths is shown in Table U.

(1) Per cent of total deaths.

(2) Rates per 100,000 population.

(3) The former method of coding tuberculosis deaths was amended effective January 1st, 1962, by the Dominion Bureau of Statistics in order to comply with the mortality classification under the International Classification of Diseases. This has resulted in a considerable increase in the number of deaths when compared with the method of coding deaths in previous years.
